Nationality: Ecuador / USA  
Languages: English / Spanish

## WORK EXPERIENCE

10/2022 – current (remote)

Outer Labs

Title: Software Engineer (tech lead)

- Tech lead on a team developing a space planning web application.
- Contributed to critical libraries used in the web application related to rendering, state management, spatial algorithms, and geometric operations.
- Developed important features across the stack.
- Was made tech lead on the project within 6 months of joining the company.

04/2021 – 10/2022 (London, UK)

KOPE / matterlab

Title: Software Developer & Product Owner

- Led the development and client engagement to deliver a modular building configurator implementing complex adjacency and stacking rulesets specific to the client's proprietary system.
- Algorithm development and general implementation during strategic pilot engagements with clients related to building enclosure systems and their strategies.
- Mentored younger engineers on best practices and design patterns.

02/2020 – 04/2021 (London, UK)

CallisonRTKL

Title: Associate Computational Design Specialist

- Developed custom plugins for Rhino + Grasshopper relating to the analysis and feasibility of building forms.
- Developed parametric tooling for the analysis and viability of an outdoor commercial development which needed the roof to have a number of performance criteria.
- Implemented a logging system for tracking usage of our internal tooling initiatives across the firm.

10/2019 – 01/2020 (London, UK)

Front Inc

Title: Architectural/Computational Technician Intern

- Worked on workflow automation and design rationalization of building enclosures across a range of projects for architects such as Foster + Partners, Renzo Piano, SO-IL, Zaha Hadid Architects.

11/2019 (London, UK)

Bartlett School of Architecture

Title: Workshop Tutor for AD Research Cluster 9

- Taught a 3-day introductory workshop on Unity and C# fundamentals to RC9 students.

12/2018-07/2019 (Boston, MA)

Gensler

Title: Job Captain / Digital Design Contributor

02/2014-11/2018 (SF & NYC)

Woods Bagot

Title: Junior Architect

- Trained colleagues on best software practices and data modeling methods to solve problems.
- Contributed to the 'growth' culture by sharing victories/lessons learned on internal channels and encouraging others to do the same.
- Initiated an internal lecture series where we invited guest speakers across NYC to speak about their work.

## SKILLS

Javascript /	C#	Unity
Typescript	Postgres	Rhino / Grasshopper
HTML / CSS	GCP	Dynamo / Revit
Canvas API	Git	Data structures
React	Gitlab	Spatial algorithms
Three.js / R3F	Azure DevOps	Design patterns
Node / NPM		

## EDUCATION

09/2018 – 09/2019 (London, UK)

University College London

Master of Science in Architectural Computation

(Grade: Distinction)

Computer-science-for-architects program where we

- learned object-oriented-programming,
- familiarized ourselves with Visual Studio and Git,
- leveraged Unity and C# as a prototyping and simulation environment, and
- implemented vanilla L-Systems, Genetic Algorithms, Kohonen Nets, Artificial Neural Networks, Octrees.

08/2008 – 05/2013 (Tucson, AZ)

University of Arizona

Bachelor of Architecture – Minor in Business

## INVOLVEMENT

10/2020 (remote)

Acadia 2020 - Hypar Workshop

- Introduced to Hypar functions in C# and Grasshopper.
- Learned how to unit test C# functions locally, and then built integrated workflows collaboratively in teams.

07/2014 (Hong Kong)

Smartgeometry 2014 Workshop / Conference

- One of four Woods Bagot employees selected to attend this international design technology workshop and conference.
- Participated in the HK Smartowers cluster where we used custom workflow tools in Grasshopper (Elefront) to integrate light-weight BIM functionality in the Rhino + GH environment.
